About Me

23 years old Multimedia Engineer, responsible and with a strong aptitude for teamwork. I am committed to achieving the best results both personally and professionally, and I enjoy working with the public when necessary.

Work Experience

Software Developer Intern

University of Valencia | October 2024 - December 2024

I worked as a Software Developer Intern at the University of Valencia, developing bioApS, a biology-related application using Ionic and Angular. I designed and implemented key features, improving usability and performance. This experience enhanced my programming skills, problem-solving abilities, and teamwork.

Sales Representative

Benidorm Marine SL | 2021, 2022 ,2023 and 2025 summer seasons

I have worked as a sales representative for maritime activities in Benidorm, where I interacted daily with people from various nationalities. This allowed me to practice several languages, primarily English and French.

Academic Background

Università degli Studi di Salerno
Erasmus+ Program | September 2023 - June 2024

Universitat de València
Multimedia Engineering| 2019 - 2025

Colegio Internacional Lope de Vega | Benidorm
High School Diploma in Science and Technology

Skills

- Good Communication
- Proactive Attitude
- Problem-Solving
- Digital Competencies
- Responsibility and Perseverance
- Commercial Skills
- Ability to Work Under Pressure
- Teamwork and Cooperation

Featured Projects

Full descriptions, links, and live demos available in my portfolio:
javileon01.github.io/portfolio

ProAffinity

Web platform for matching professionals and companies with a custom affinity algorithm based on skills and additional criteria. Users can manage profiles and job offers, benefiting from a responsive, user-friendly interface.

Django   JavaScript   MariaDB   HTML5   CSS3   Tailwind CSS

bioApS

Developed and published during my internship at the University of Valencia (Faculty of Biological Sciences). bioApS is an educational app designed for Valencian-speaking students. Features include a complete redesign and migration to Angular, interactive glossary, educational videos, and quizzes.

Angular   Ionic   TypeScript   HTML5   SCSS   Capacitor   REST APIs

Travel & Taste - Zürich

Responsive tourism web developed for a university project. Offers a curated guide to Zürich (food, attractions, local tips) and integrates a live weather API.

HTML5   JavaScript   CSS3   REST APIs
